Catalogus en Productinformatie

Van Rosmalen

Rubbertechniek

Beste klant,

In deze catalogus vindt u meer dan 1850 rubberprofielen en onze standaard mogelijkheden in pakkingen en ringen. Vormwerk producten kunt u in deze catalogus niet terug vinden omdat deze alleen op klantspecifieke wensen geproduceerd worden. Als u het gewenste product niet kunt vinden kunnen we dat voor u maken. U kunt dan een tekening of gewoon een stukje van het te maken product toesturen en wij maken dat. Ook voor kleine oplages kunt u bij ons terecht.

Hoe kunt u onze rubber artikelen bestellen?

Elk van onze producten is op maat gemaakt. Wij hanteren dus geen voorraden. De minimale productie batch is 1 kg profielen of ringen. Vormwerkartikelen kunnen ook in kleine batches besteld worden, wij maken dan gebruik van rapid prototyping. De standaard leverdatum is ongeveer twee of drie weken na het plaatsen van de bestelling, of zoals overeengekomen. Bestellingen kunnen per e-mail worden verzonden. Neem gerust contact met ons op als u vragen heeft of voor een prijsofferte.

Met vriendelijke Groet,

Jeff van Rosmalen

Rubbertechniek

Onze producten

Rubber profielen

Wij kunnen profielen produceren in diverse rubberkwaliteiten. Denk hierbij aan EPDM, NBR, TPE, TPV, Silicone en Viton. Al deze rubbersoorten zijn in verschillende hardheden en kleuren verkrijgbaar. Er is ook een mogelijkheid tot FDA voedsel goedgekeurde profielen. In principe zijn alle vormen mogelijk. Bekijk onze standaard oplossingen vanaf pagina 8.

Snij en stans producten

Vanwege diverse productietechnieken zijn de mogelijkheden voor het maken van een pakking bijna eindeloos. Ze kunnen gemaakt worden uit plaatmateriaal of celrubber, maar ook uit diverse soorten profielen welke aan elkaar gelast kunnen worden als ring. Bekijk onze mogelijkheden op pagina 5.

Vormwerkproducten

Het produceren van vormwerkproducten is ook een mogelijkheid bij ons. Al deze producten worden klant specifiek gemaakt en zijn daarom niet terug te vinden in onze catalogus. Deze producten zijn te verkrijgen in diverse rubbersoorten zoals EPDM, NBR, SBR, Viton, Silicone en in combinatie met metaalverbindingen. Al deze producten zijn ook verkrijgbaar in diverse hardheden en kleuren. Bent u benieuwd of wij uw product kunnen maken? Stuur u dan een E-mail naar info@vanrosmalenrubbertechneek.nl of bel ons.

e-mail: info@vanrosmalenrubbertechniek.nl

www.vanrosmalenrubbertechniek.nl

Toleranties van geëxtrudeerde producten zijn volgens ISO 3302-1. Rubberproducten worden normaal geproduceerd in de standaard kwaliteit tolerantieklasse. Indien nodig kunnen wij onze producten ook nauwkeuriger produceren.

Bestendigheid: 1 – zeer goed, 7 – slecht bestand

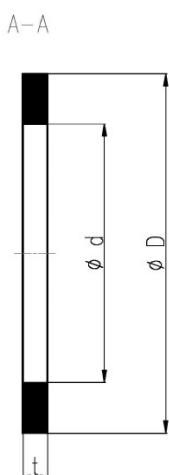

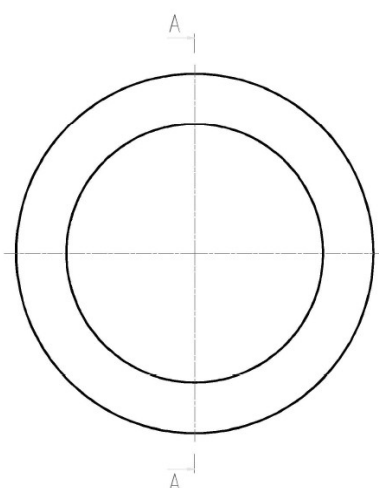

Wij kunnen alle producten ook van andere mengsels (hardheid, kleur) of van verschillende elastomeren leveren. Gedetailleerde informatie over eigenschappen en bestendigheid van rubbermengsels kan op verzoek worden verstrekt.

HARDHEID EN BESTENDIGHEID

Van Rosmalen

Rubbertechniek

$\varnothing D$ max. ≈ 115 mm

$\varnothing d$ min. = 2mm

t min. = 1mm

Wij produceren rubber ringen en schijven op verschillende manieren.

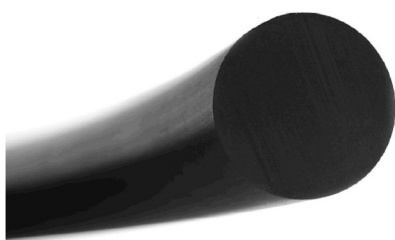

Ringen en schijven kunnen gestanst of elektronisch gesneden worden uit plaat- en celrubber maar ook gestoken worden van slangen of staven. Uiteraard zijn dan ook andere vormen dan alleen ringen mogelijk en kunnen wij kiezen uit verschillende compounds.

Via elektronisch snijden kunnen wij producten maken in iedere gewenste vorm van plaat- of celrubber.

Wij kunnen rubber ringen op vrijwel iedere maat maken in vele rubberkwaliteiten. Gestoken ringen en schijven kunnen wij produceren tot een diameter van 115 mm. Afsteken van ringen en schijven kan vanaf een dikte van 1 mm. Als wij ringen en schijven steken kunnen wij deze artikelen ook maken van andere rubberkwaliteiten en kleuren dan van de standaard keuzes.

Gelijmde ringen kunnen wij op kleine en grote lengtes maken. De diameter van die ringen is niet beperkt. Momenteel hebben we een assortiment van ongeveer 1200 profielen welke geschikt zijn voor verlijming tot ringen.

Staven en slangen.

Staven en slangen zonder koord inlage kunnen ook worden geproduceerd met een maximale diameter van ongeveer 115 mm. Voor deze artikelen zijn geen spuitplaatkosten noodzakelijk, spuitplaten voor vrijwel alle maten zijn voorradig
